IMPROVEMENT

Ladies' Boots.

F. SEAL,

Has just received a new invention, in the way of an improvement in Ladies' Boots. The boot is made high in the leg, with elastic sides. The improvement consists s now receiving and opening direct from New fork and Philadelphia, one of the most desir-ble stocks of goods everoffered in this market, onsisting in part of in arranging the elastic and lining, that the elastic will clasp the ankle; and the lining, while protecting the elastic from the sweat of the foot, will also yield to its contraction and expansion. Its great beauty is this: that it is easy to put on, fits snugly when on, and protects the foot and limb from cold. It will certainly be a favorite with the ladies. Samples can be seen at his shop.

Mr. Seal has the sole right for

this town and township.
